

Asterion[®] DC ASM Series:

Enhanced 3-Channel Programmable Power

3

Independent, isolated, 1,700W outputs in a 1U high chassis for up to 5,100W total power.

9

Full power output options that can be mixed or matched to create custom solutions.

Key Highlights:

Complete remote programming and control via Virtual Panels™ GUI, and intuitive front panel touch screen operation.

- Nine voltage options from 40V to 600V
- 1U rack-mount chassis
- Multi-language, intuitive, color touch panel control
- Active power factor correction (PFC)
- Multi-channel programmable sequencing, ramps, and delays
- Standard LXI Ethernet, USB and RS232 control interfaces
